### Casino Technology

The partnership between Casino Technology and Heber goes back a long way. Over 10 years ago Casino Technology approached Heber when they needed an off-the-shelf embedded control solution. This solution was Pluto 1. Casino Technology went on to use newer versions of the Pluto board as the Heber range of gaming control solutions expanded.

When the hugely successful Pluto 5 board was launched in 1997, Casino Technology used this with great success in their gaming machines.

Casino Technology use Pluto technology.

Casino Technology then approached Heber and requested a custom Pluto 5 variant board. Heber was able to design a new, bespoke board - Pluto 5 Integrated Video - exclusively for Casino Technology.

In 2006 Casino Technology took delivery of the 500,000th gaming control board that Heber has produced. This landmark achievement was recognised with a presentation to Casino Technology at G2E, Las Vegas 2006. The successful partnership between Casino Technology and Heber continues to grow.

If you are looking for world class gaming control systems and gaming peripherals, lightning fast time-to-market and comprehensive free customer support, please contact Heber: [sales@heber.co.uk](mailto:sales@heber.co.uk)
