Press release title : HEBER GO THE EXTRA MILE FOR SPORT RELIEF

Date of release: March 2010

Publish date: IMMEDIATE

Included images: Sport Relief Logo

Contact: Amy James : amy.james@heber.co.uk

As part of Heber's ongoing commitment to local and national charities, we will be putting our best foot forward and rising to the challenge to go that extra mile. We will be taking part in the forthcoming 'The Mile' in aid of Sport Relief 2010.

Our mile long walk starts at 1.30pm on Friday 19th March, from the Heber offices, and will take us through some stunning countryside and along the banks of the River Frome and the Stroud Water Canal in Gloucestershire.

We have set a goal amount of what we would like to raise, and are nearly half way there. If you would like to join us on our breathtaking walk or would like to sponsor us, please visit <http://www.mysportrelief.com/heber>.

All the money raised will be spent by Comic Relief to help transform the lives of poor and vulnerable people, both at home and across the world's poorest countries. For more information on Sport Relief 2010 visit [ww.sportrelief.com](http://www.sportrelief.com).

...release ends.

Editor's notes

Heber is the leading designer and manufacturer of electronic control systems for the gaming and amusement industries.

With over 25 years experience within the market place Heber has created the Pluto range of Embedded Reel Control Systems, which are in use with major manufacturers in over 600,000 machines worldwide. Pluto 8 is the latest addition to the Pluto family and provides faster performance, more memory, integrate dual video on board, and advanced security features.

Nucleus provides an all-in-one PC based gaming controller system specifically designed for the global gaming markets along with kiosk, vending and amusement systems.

The XLine range of USB peripheral interface boards, including X10i, Xspin and XLuminate, complement any PC based platform that has a USB port, including Nucleus range, adding the control, I/O and security needed in modern amusement or gaming machines. XLuminate is a multi-effect LED and lighting control module that adds stunning lighting effects to gaming systems. XSpin can be used with Any PC based gaming systems to control up to eight mechanical spin reels in Uni-polar or Bi-polar operation.

Heber produces Development Kits for all its range of control systems. The Development Kits provide an ideal test environment for gaming system developers and speed up development while reducing the time-to-market.

Heber products can be ordered from its Chalford, Stroud office in the UK or from its distributors in Buenos Aires, São Paulo and Sydney.
